Office Solutions Wraps up another Year as a WRAP Award Winner

The state of California awards Office Solutions with their 4th consecutive win for their environmentally friendly business strategies and enhanced recycling efforts.

YORBA LINDA, CA (December 21, 2011) —Office Solutions, Southern California’s largest independent commercial office product and furniture supplier, announced their 4th consecutive win of the WRAP award in the California Department of Resources Recycling and Recovery (CalRecycle) program. Established in 1993, the Waste Reduction Awards Program (WRAP) provides an opportunity for California businesses and nonprofit organizations to gain public recognition for their outstanding waste reduction efforts. Other 2011 winners include Hewlett Packard, Intel, Yahoo, Apple Inc., and Jet Propulsion Laboratories.

WRAP 2011 award honorees earn the rights to use the WRAP winner logo. The logo is authorized to be used on products, advertising and business websites to show that the State applauds their efforts to reduce waste.

Office Solutions, having recycled over 1,134,489 lbs. of waste, has proven to be a sustainability pioneer. Being a fourth year WRAP award recipient, Office Solutions has maintained and shown their dedication to the conservation of used resources. Started in 1984, Office Solutions developed their own internal recycling program. To continue their push towards best green practices, this internal “Lean Green” program became a complimentary service to its clients. “I see the award as affirmation of our company-wide efforts to be a responsible corporate citizen,” said Office Solutions President and co-founder, Bob Mairena. “Our environmental efforts are more rewarding because it encourages our customers to put in place their own recycling programs,” Mairena concluded. To date more than 300 companies have signed up with the “Lean Green” program.

Office Solutions strives to be a stand-out leader among the office supply industry, and has created company-wide initiatives to build up their “Lean Green” campaign.

- Monthly “Green” newsletters, statistics, tips and eco-friendly product information are posted on the Office Solutions website and through social media channels such as Facebook and Twitter.
- A step-by-step “Lean Green” program was developed to aid customers in launching their own recycling programs. Recycling basics, green product catalogs, sustainability statement templates and environmental impact worksheets are a just a few of the items featured within this program.
- Client site based recycling receptacles with free pick-up of paper, electronics, cardboard, batteries, scrap metal and more helps encourage customers to endorse the Office Solutions’ waste reduction business model.

With new state legislation requiring business to be accountable for their waste, starting July 1st, 2012, Office Solutions is now making it a new mission to show businesses how to comply with state regulations utilizing the “Lean Green” program.

Office Solutions, the largest independent commercial office and technology supplier in Southern California, services national corporate accounts throughout the United States with next-day service along with offering the most advanced procurement systems in the industry. Office Solutions is continually recognized in the Orange County Business Journal as one of the top 25 Orange County woman-owned businesses as well as being in the top Orange County minority-owned businesses. The company has also been acknowledged for encouraging employees to share their time and resources with local charities such as Festival for Children, City of Hope, META and numerous other local organizations.

Office Solutions strives to create a spirit of creativity and teamwork, as well as a commitment to exceptional customer service.
